Famous Old Ryepatch Mines Form Basis of Local Corporation

The organization of the Ryepatch Consolidated Mining company, which involves the resurrection of one of Nevada's greatest silver mines, has just been consumated in Salt Lake city. following discoveries of a startling nature that have just come to light in The ore body was disclosed at a depth the old Ryepatch mine workings, about fifty miles from the Seven Troughs district in Humboldt county, Nevada. The Byepatch mines, incluing the Silver Bell and the Alpha, which have produced in the neighborhood of \$14,000,000 in values, and which were tied up in hopeless litigation prior to 1873, have been found by C. D. Ray and associates to still erations there. However, it is the contain evidences of wealth that promlse to completely eclipse all the former glory of these famous properties.

Following a quiet investigation covering the old mine workings, the surrounding grounds, Humboldt county records and deeds and titles in San Francisco and lasting for more than eight months, Mr. Ray has effected the purchase of both the famous old producers and much surrounding territory, and the organization of a com pany, which began taking out ore sev eral days ago, and it can be safely predicted that operations and disclos ures are involved of greater import ance than anything that has come to light in Nevada in recent years,

The officers and directors of the company are C. D. Ray, president James H. Linford of Logan, vice-pre-Ident; S. A. Greenwood of Salt Lake, recretary; Weston Vernon of Logan, director; J. E. Ray of Salt Lake, di-The company is capitalized | at 1,000,000 shares at a par value of

25 cents a share. Most sanguine predictions as to the issue of the new enterprise are based upon a series of careful examinations and assays covering the last months and culminating in an examination and report just made by Professor Bowen, geologist and chemist at the B. Y. college at Logan. These examinations and reports show that the colossal product of these two prop erties, which is attested by the Hum boldt county bullion tax records, same entirely from above the tunnels, which attain a total depth at the deepest point of only 200 feet. In this surface ground there have been opened up by twenty-five enormous stopes, some large enough, it is said, to contain an average building block, and one in particular, the Borland stope, from which upwards of \$2,000,000 in values was extracted in ninety days in the early seventies. These stopes repreore chambers, formed by the displacement of the lime, ramifying from the

Luckily the blow was glancing and he soon revived.

Tohlman then drew a buttonhook which he had sharpened to a needle's edge, from his pocket, and plunged it into the side of his neck, inflicting a frightful gash. He tried to stick the buttonhook into his heart, but failed. Several minutes later he was found almost dead from loss of blood. It is believed he will die.

CIVIL SERVICE EXAMINATIONS

Salt Lake, April 16 .- The United States civil service commission announces an examination in May 19-20. to secure eligibles from which to make certification to fill vacancies as they may occur in the supervising architect's office in the position of architectural draftsman, at salaries of \$1,200 per annum and upward, and in the po sition of junior architectural drafts man, at salaries ranging from \$840 to \$1,000 per annum.

As an insufficient number of eligibles to meet the needs of the service resulted from the examinations held in March 10-11 for these postitions, quali fled persons are urged to enter these

examinations. The age limit, both positions, is 18 years or over on the date of the examination. Competitors in the above examinations will be furnished with whatever drawing paper and tracing vellum is necessary, but they must supply themselves with drawing board not less than 18 inches square and all other drawing materials which they deem necessary.

Applicants should at once apply

either to the United States civil ser vice commission, Washington, D. C. or to the secretary of the local board

DAMAGE CASE ENDS

Judge Munger Instructs Jury to Find for the Defendant.

Salt Lake, April 16 .- In the United States district court today, the case of Mike Bran vs. The Tintic Mining & Development company was brought to a close by the court instructing the jury to bring in a verdict for the defendant. It was held that the evidence was not sufficient to sustain the allegation of negligence on the part of the company

The suit arose from the explosion of a missed hole in the drift on the sixth level of the company's mine in Bing-ham canyon, on March 7, 1907. On that day, the plaintiff states that he was put to work in the mine. He had drill-ed two holes with the machine drill and was well along with the third one when the missed charge was struck, the explosion of which caused the loss of both his eyes as well as fracturing his skull, breaking his left arm and leg and also three ribs. The suit was for \$40,000 damages.

Portland, Ore., April 17.-Consum mation of the purchase, of the entire Greene in Mexico, by a syndicate of San Francisco and New York capitailsts for \$32,000,000, is reported by

Mr. Cone, about two years ago ganized a party in Portland for the purpose of inspecting the timber land, tne purchase of which was then under contemplation by the men who have just closed the deal. The tract, into which other parties were also sent, is about sixty miles wide by 120 miles long and lies just south of the international boundary line in the state of Chihuahua. It has a growth of yellow

pine timber to the extent of 15 bil-Three railroad lines had already been extended into the tract by Col. Greene's companies and three immense lumber mills erected. The purchasing syndicate has acquired the railways and mills and now has a millwright at Ei Paso looking over availis announced that by 1911 the new company will be prepared to manu-
